

Sorting Levers

Using the various levers provided in class (bottle opener, scissors, tweezers, nut cracker, staple remover, hammer), sort them into classes according to the arrangement of the effort, fulcrum, and load:

- effort-fulcrum-load 1st class lever
- effort-load-fulcrum 2nd class lever
- load-effort-fulcrum 3rd class lever

Explain why they belong to that class of levers.

	List the levers you found from each class.
 <p>1st Class</p> <p>effort load</p> <p>fulcrum</p>	
 <p>2nd Class</p> <p>effort load</p> <p>fulcrum</p>	
 <p>3rd Class</p> <p>load effort</p> <p>fulcrum</p>
